# GUESS THE RIVER INVERTEBRATE!

Connect the dots to match the descriptions on the left to the correct species on the right.

I have 3 tails and gills on my abdomen so I can breathe

I can be found with or without a case

I am usually curled up and have lots of legs

I have 2 tails. I'm very sensitive to pollution

I stay on the riverbed rocks by using my suckers

I have no legs. You might have seen my relatives in the soil!

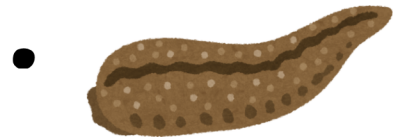

Stonefly

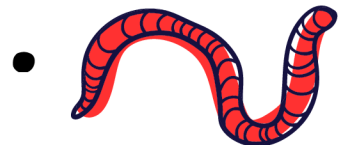

Mayfly

Leech

River Worm

Caddisfly

Shrimp
